Medications

All medications taken at school time need to have a form (s) completed by the doctor prior to the use of the medication at school, even if it is for a temporary condition or over the counter medication.

Any and all medications can be given as long as we have the proper paperwork at school; short or long term, i.e. Tylenol, antibiotics, lotions, or drops.

Epi-pens and nebulizers need protocols forms and doctors orders, and may not be carried by a student

Adults must drop off and pick up any and all medications used by students attending school; no medications may be brought to school by a student and will be confiscated.

To ensure the health and safety of your child, please besides informing the teacher, please inform the school nurse of any health conditions whether they require medications or protocols or not: asthma, seizures, diabetes, heart disease, any chronic or acute health conditions; if your child is going to have surgery, or uses *medications while at home*.

Please call the office immediately if your child has chicken pox or any condition that is contagious. We will need a readmittance from the doctor for all contagious diseases, illness more than 3 days and post surgical/emergency room visits as well as orthopedic injuries-sprains, fractures, ace wraps or stitches.

Please notify nurse of any special needs your child may have as soon as possible so that we may make appropriate accommodations.

Please notify the nurse/teacher if your child wears corrective lenses while at school.
